Workload estimation

2022/05/12

1- Phase One:

Steps:

- a. Prototype: which is not functional but shows the layout. It hasn't been professionally designed yet and is a base to start the development process.
- b. MVP: same as prototype but functional and performs as a test project to finding bugs and planning additional features and alpha test.
- c. Beta: which is expected to be bug-free and flawless

Features:

- a. Metamask wallet support.
- b. BNB lottery Bucket.
- c. Sponsoring bright future web3 projects by presenting and selling their tokens.

Step	Title	Prerequisites	Estimated implementation Hours	How long it took
1	Prototype	UI template	4	8
2	MVP	Smart contract	10	
		UI integration kit	4	
		Server application	10	
		Alpha test	4	
		Debugging	6	
3	Beta	Redesign	6	
		Adding KYC	10-20	
		Releasing Beta	1	
Total			55	

2- Phase two:

Features:

- a. Adding BTC, ETH, ... buckets.
- b. White list, AML, premium membership, ...
- c. Some other thing that we fell needed in the phase one development.

Step	Title	Prerequisites	Estimated implementation Hours
1	Adding other Cryptos	BTCB	10
		ETH	10
		BUSD	10
		USDT	10
Total			40
2	whitelist	Internal	4
		External	dependent
3	AML	negotiation with the third-party	dependent
4	premium membership	Definition of the criteria	6
		Implementation	20
Total			66

3- Phase Three:

Features:

- a. Releasing Project's token.
- b. Steaking.

Step	Title	Prerequisites	Estimated implementation Hours
1	Releasing Project's token	Implementation of PLS Architect on smart contract	40
		Preparing listing requirements	20+
		Audit	dependent
Total			60+
2	Staking	Definition of the criteria and concept	10
		implementation	20
		Test and debug	20
		Reimplement	20
Total			130+

4- Phase Four:

Features:

- a. Releasing NFT.
- b. Grand prize (with an extra ordinary amount) for NFT owners.

Step	Title	Prerequisites	Estimated implementation Hours
1	Releasing NFT	Definition of the criteria and concept	10
		Smart contract Upgrade	10
		Minting	10
Total			30
	Grand prize	implementation	20
		Test and debug	20
		Reimplement	20
Total			90

5- Phase Five:

Features:

- a. Multichain compatibility.
- b. Supporting more wallets.

Step	Title	Prerequisites	Estimated implementation Hours
1	Multichain	Definition of the criteria and concept	10
		Implementation	?
	More wallets	implementation	?
Total			?
